**Q: Why did you spend 15 years of your life creating Tomii Academy?**

*A: Most every child, from the minute he escapes the guidance of his parents and comes under the tutelage of the State, is born into a world of lies. The average child, quite sadly, may experience, from the time of birth to death, a mere six years of mental freedom and zero years of economic freedom. As a child grows into a young adult, his or her world of lies is reinforced through print and television media, academia, and the prominent attention given to the words of [the world's business and political leaders, as he or she remains unaware of the lack of congruity between the words and actions of these leaders. Somewhere along this path, these lies become part of a child's internal belief system and stay with that child for an entire lifetime. It is necessary for global financial, academic, and political leaders to continually spread, perpetuate and reinforce these lies to maintain control over billions in their created Welfare State.*

**Q: Are your courses just written or do you have audio files as well so I can listen to them?**

A: We offer both written materials and audio files that are a recitation of the written materials for every single lesson and exercise of every course. Hopefully you like the Founder's voice as he recited every single lesson and exercise himself and decided not to use AI to produce the vocal transcriptions because so many people hate the artificial intelligence voices that are most popularly used today.

Though it required hundreds of hours to provide audio files for all coursework in my Academy, I provided it as I knew many people would ask for this feature.

**Q: Will you be offering courses in any other language besides English?**

A: In the future, we hope to offer courses in other languages like Spanish, Japanese, Korean, Thai, Simplified Chinese, German and French to name a few. We have looked at some AI programs to accomplish this task for us, but we have run into problems as there is a lot of technical finance, business and investment jargon that AI translation programs struggle with in the provision of a clear translation.

Consequently, we are waiting for future iterations of AI language translation programs to improve in their translation of business and investment related jargon or to hire human translators to do this work for us in the near future. As the coursework consists of thousands of pages of material, our sincere hope is that future iterations of AI translation will improve significantly as human translation is quite a daunting task for anyone.

**Q: Do you provide the process by which you provide price predictions for gold and silver, and sometimes for BTC, on your patreon platform, as this would be a very valuable tool, given the accuracy of your price predictions over the years?**

A: I provide about 85% of the tools in my Academy coursework, especially in Course O, that I use to personally make my gold/silver price predictions every week on Patreon. However, there are a couple of tools I don't reveal because I've been working with a business partner to develop a computer algorithmic predictive model for gold/silver to sell to institutions. We're not sure if this will ever come to fruition but my partner asked me not to disclose everything I use to make my price predictions because it would compromise our current efforts.

But I can honestly say that I reveal about 85% of the tools I use. But even so, as I've stated many times in the past, even if I revealed 100% of the tools I use, my price prediction process is not a linear process and without doubt, my experience of literally looking at gold/silver price behavior for more than two decades shapes my predictions. This is why, though it is literally impossible to know when the Chicago Mercantile Exchange will raise initial margins and maintenance margins on gold/silver futures contracts that trade in New York, I was still able to give warnings within 24 to 48 hours of it happening two times within the past few years. If someone told me they would pay me 1000:1 if I could do this before I actually did it, I wouldn't even have bet \$1,000 to win a \$1,000,000 because I would have thought the odds of doing what I did would be 100,000,000: 1.

Consequently, since there is no mathematical algorithm that can reveal how I do what I do in the arena of gold/silver price predictions, I believe the 85% of revealed tools, plus the experience of time, to be adequate in granting someone confidence to spot major moves in gold/silver prices with decent accuracy.

**Q: Are your courses downloadable?**

A: Only a small fraction of all available coursework is downloadable. Downloadable and printable courses are confined to only exercises that may require a long time frame to complete and perhaps complex answers in which having a hard copy of the exercise facilitate much easier completion. Otherwise, audio files are relegated to streaming and written materials are relegated to online access. However, written materials will automatically save at the last point of completion, so if you stop reading a lesson at page 18 of 45 pages, when you access this course online again, it will automatically open on page 18.

When I ran a consulting company in the past, people I hired consistently found my written materials being re-sold on other websites throughout Asia, with one brazen criminal even replicating my entire website in China and stealing my revenues by reselling my analysis. Though we imprinted all purchased analytical research in the past with the buyer's name, address and email address so other people would be aware they were illegally purchasing stolen IP, even these preventative measures did not stop thieves from reselling my IP. Consequently, for this reason, we unfortunately had to make the decision to not make our coursework available through downloads but only online.

**Q: Can your coursework be accessed offline?**

A: Though this is one of the major advantages of xAPI files, of which format all of our written materials possess, unfortunately at this time, our Learning Management System platform does not yet have the capability to make xAPI files accessible offline. If you are unfamiliar with the xAPI format, xAPI stands for "Experience Application Programming Interface, or Tin Can API" and is a learning technology interoperability specification that makes it easier for learning technology products to communicate and work with one another. However, though not yet accessible offline as of our launch in April 2024, we hope to be able to offer offline accessibility to our written materials at some point in the future, though an internet connection will be needed for the foreseeable future to access the audio files.

**Q: I would really like to take your courses but my income level will not allow it? Any chance you will offer scholarships in the future?**

A: Absolutely. At some point during the first year of operation, I will launch a scholarship program in which I will give away memberships to my Academy for free, after we establish some type of methodology to verify that we are indeed providing free scholarships to those of low-income status that truly cannot afford our courses.

**Q: How does your subscription model work?**

A: The annual subscription fee is the only subscription model that does not automatically renew at the end of the subscription period, meaning that the one time payment

grants access to a course for a one year period. Any desire to extend access to a course purchased on a year subscription can be made by purchasing another one-year subscription. All monthly/weekly subscriptions (only monthly available as of launch) automatically renew and must be cancelled before the next renewal period, as stated on the checkout cart at the time of purchase. No partial refunds are granted for cancellation in the middle of a renewal cycle.
